GROUPS.*

**BADGERS:
SYSTEMATICS, BIOLOGY,
CONSERVATION, AND
RESEARCH TECHNIQUES**

Edited by
GILBERT PROULX & EMMANUEL DO LINH SAN

This book is about 16 species of small to medium-sized carnivores that occur in North America, Europe, Asia, and Africa. In this book, highly qualified scientists from around the world reviewed the scientific literature on badgers, and brought forward new findings, related to the species' evolution, distribution, ecology and conservation.

\$ 80 US hardcover – shipping included.
