INTOLERABLE CRUELTY

The truth behind killing neck snares and strychnine

by Gilbert Proulx

Intolerable Cruelty is about **killing neck snares** that are used in Canada to kill thousands of red foxes, coyotes, wolves and non-target animals. This book discloses exclusive snapshots of long and painful deaths of snared animals, and reviews scientific findings related to their cruelty and non-selectivity.

Intolerable Cruelty is also about the use of **strychnine** in Canada to kill predators. This book reviews how strychnine baits are used to destroy wolves and an array of non-target species.

UPCOMING CWBM ISSUE

CONSERVATION AND MANAGEMENT OF MESOCARNIVORES

The *Canadian Wildlife Biology & Management* journal will produce **a special issue on the Conservation and Management of Mesocarnivores** (members of the mammalian Order Carnivora with a body mass <21 kg) that will be published in spring 2020 (Volume 9 Issue 1). If you are involved in the research, conservation or management of species of the *Martes* Complex (martens, fishers, wolverines, tayras), other mustelids, mephitids, canids, and felids, consider submitting a paper for this special issue.

G. Proulx©

Please consult www.cwbm.ca for Authors' Guidelines and previous issues of the journal. Papers should be submitted by mid-December 2019 – they will be peer-reviewed, and accepted manuscripts will be published in spring 2020.

If you plan to submit a paper for this 2020 issue, or if you want to discuss some ideas, please send an email to the Editor-in-Chief, gproulx@alphawildlife.ca.
